

CCD DISPOSITION MEETING SUMMARY

I. General Information

- A. PMN: L08-0089
- B. Date: January 31, 2008
- C. Program Manager: Adella Underdown

II. Discussion:

Previous Decision:

01/03/08: L08-0089 was given a conditional denial based on an acute ecotoxicity risk releases to water during processing, where the 10 ppb COC was exceeded [REDACTED]. Potential risks to human health were addressed by adequate dermal protection and negligible inhalation exposures. To address ecotoxicity risk the submitter should eliminate releases to water.

New Information:

In amendments dated January 14th and 16th 2008 the submitter cited the releases of concern from: Cleaning Liquid Residuals from Containers Used to Transport the Raw Material and Equipment Cleaning Losses of Liquids from Multiple Vessels (the residual from the pails during processing and the residual from the reactor).

The amendment states that the [REDACTED]

[REDACTED] No releases. [REDACTED]

The second amendment addressing processing equipment cleaning states that [REDACTED]

[REDACTED] There will be no release to surface water.

III. Final Disposition and Rationale:

The Program Manager recommends that L08-0089 be given a final conditional grant based on the new information. The CCD Dispo participants agreed with the Program Manager's decision.
